

WICORMARINE ANNUAL MOORING & STORAGE PACKAGE

The Annual Mooring & Storage Package is designed to offer a number of benefits in return for committing to a full years mooring and storage costs. It offers a flexible sailing period with the added peace of mind of a reserved winter space in the yard. Customers choosing the package enjoy a 5% discount off the published prices for the elements of the package.

The package runs for a twelve month period from 1st April to 31st March and consists of your mooring, winter storage and associated boat handling (the round trip includes collection from Wicormarine mooring, haul-out, scrub, block off and relaunch and return to mooring)

Extended Laying-Up Storage Charges

The package is ideal for owners who require a period of winter storage but who want the flexibility to extend the sailing season with an early spring launch and/or a late haul-out. Please remember we operate a first out, last in policy and vice versa when storing boats in the yard.

Existing customers who choose not to renew their package when invited to do so in September and who remain in the yard beyond 31st March following the laid-up period will incur ongoing storage charges from 1st April at the prevailing rate.

Existing customers whose vessels remain in the yard beyond their nominated launch date will be charged additional storage from 1st June until such time as their vessel is launched before the end of the sailing season.

Customers who have paid for the package but choose not to take up their mooring and instead remain stored in the yard for the full sailing year will pay additional storage charges from 1 June to 31 October. Additional charges may also apply if it becomes necessary to move the vessel. No refunds will be possible in respect of unused mooring charges or unused boat handling charges contained in the package.

New Customers

New customers opting for the package who wish to arrive before 1st April will be charged for the additional time on the mooring on a pro rata daily basis.

However, where the package has been secured in advance, no refund for unused days will be made to new customers arriving after 1st April.

PLEASE NOTE

We are unable to refund charges on cancellation or vacation of moorings during the sailing season. Therefore, package customers who remove their vessel prior to the winter laying-up period will not be entitled to a refund.

We do not use cradles but instead use traditional shores with diagonal bracing as required.

Quotations obtained from our web site include storage on hardstanding. Vessels requiring storage undercover in a boatshed or open-fronted leanto will attract a higher storage rate.

Mast unstepping and re-stepping and mast storage are optional services and will be charged on an ad hoc basis.
